

`void *init_libmalconduit`

Instance of KLibFactory
subclass

Instance of ConduitSetup
subclass (QDialog child) for
conduit configuration

`exec()` shows
the config
dialog

Instance of ConduitAction
subclass to do the actual
synchronization

`exec()` does the
sync

```
graph TD; A[void *init_libmalconduit] --> B[Instance of KLibFactory subclass]; B --> C[Instance of ConduitSetup subclass (QDialog child) for conduit configuration]; B --> D[Instance of ConduitAction subclass to do the actual synchronization]; C --> E[exec() shows the config dialog]; D --> F[exec() does the sync];
